Web Technologies — Final Year Project**CONCEPT NOTE***Final Year Project — Stage 1 Submission***MWANI FINANCE HUB**

Student Name	KHAMIS JUMBE USSI, AISHA MABROUK MAHMOUD
Registration No.	24BIT109, 24BIT014
Programme	BITAM, BITAM
Academic Year	2026
Supervisor	MASOUD HAMAD MMANGA
Submission Date	29/06/2026

About This Document

This Concept Note presents the proposed MWANI FINANCE HUB, a web-based financial inclusion and business support platform designed to empower entrepreneurs, small businesses, women, youth, seaweed farmers in Zanzibar. The project aims to improve access to financial services, investment opportunities, business mentorship, and financial literacy through an integrated digital platform.

The purpose of this Concept Note is to provide an overview of the project's background, the problem it seeks to address, the proposed solution, objectives, scope, expected outcomes, and the technologies to be used.

Document Revision History

Version	Date	Author	Description of Change
0.1	29/06/2026	KHAMI JUMBE USSI. AISHA MABROUK MAHMOUD	Initial draft

1. Project Title

Working Title: MWANI FINANCE HUB: A Web-Based Financial Inclusion and Business Support Platform for the Zanzibarian Community

2. Background and Problem Statement

Zanzibar has experienced significant growth in tourism, agriculture, fisheries, and entrepreneurship. However, many entrepreneurs, women, youth, seaweed farmers and fishermen still face limited access to financial services, business mentorship and investment opportunities. The lack of a centralized digital platform limits business growth, financial literacy and access to funding.

3. Proposed Solution

Develop a web-based platform called MWANI FINANCE HUB to connect entrepreneurs, investors, financial institutions and mentors. The platform will provide financial education, business registration, funding applications, mentorship and business performance tracking.

4. Aim and Objectives

4.1 Aim

To design and develop a web-based financial inclusion platform that improves access to financial services and business support for entrepreneurs in Zanzibar.

4.2 Specific Objectives

- To Design an interactive web platform.
- To Develop entrepreneur and business profile management.
- To Implement loan and investment application modules.
- Provide financial literacy and mentorship resources.
- Evaluate system usability and effectiveness.

5. Scope

5.1 In Scope

- User registration
- Business profiles
- Loan applications
- Investor matching
- Mentorship
- Reports

5.2 Out of Scope

- Mobile banking transactions
- Cryptocurrency
- International investment management

6. Target Users and Beneficiaries

Administrators - Registering and managing all system users

Entrepreneurs - Apply for loans, grants, or investment opportunities

Investors – Browse entrepreneur business proposals.

Financial – Communicating funding decisions to applicants.

Institutions - Reviewing funding applications submitted by entrepreneurs.

Mentors - Register as mentors on the platform.

7. Proposed Tools and Technologies

Layer	Proposed Technology	Justification
Front-end	HTML5, CSS3, Bootstrap 5, React.js	Basic
Back-end	Django (PYTHON)	Simple
Database	PostgreSQL	Simple
Hosting / Other	GitHub, REST API	Simple

8. Expected Outcomes and Significance

A functional web platform that improves financial inclusion, entrepreneurship, investment access, financial literacy, and economic empowerment in Zanzibar.

9. Preliminary Timeline

Phase	Activity	Approx. Duration
1	Requirements gathering & analysis	2 Weeks
2	System design (SRS, SDD)	2 Weeks
3	Implementation / coding	3 Weeks
4	Testing & evaluation	2 Weeks
5	Documentation & defence	2 Weeks

10. Preliminary References

Declaration of Authorship and AI Use

A. Permitted vs. Not Permitted

Permitted (must still be declared)	Not Permitted
Explaining a concept or technology to you	Generating your problem statement or objectives
Generating boilerplate / syntax you then adapt	Producing your design decisions or architecture rationale
Helping debug code you wrote	Filling this template so the work is not your own
Improving grammar of text you authored	Writing analysis you cannot explain in a viva

B. AI Tools Used in This Submission

AI Tool / Service	Specifically used for	Section(s) affected
ChatGPT	Language improvement, concept organization, and formatting	Entire Concept Note

C. Student Attestation

I confirm that the intellectual content of this concept note, including the project idea, analysis, design decisions, and conclusions, is my own work. AI assistance has only been used for improving language, formatting, and organizing the document. I understand that I may be required to defend every section of this submission during the oral presentation.
